📍 Alexandria, Egypt

Mazen Emam
Frontend Developer

EDUCATION

Udacity
React Nanodegree
Jul 2022 - Aug 2022

FreeCodeCamp
JavaScript Algorithms And Data Structure
Jun 2022 - Jul 2022

Information Technology Institute
MEARN Track, 3 Months diploma
Sep 2020 - Dec 2020

Alexandria University
Bachelor of Science in Management Information System, Faculty of Commerce
Oct 2013 - Jul 2017

PROFICIENT SKILLS

- HTML / HTML5
- CSS / CSS3
- JavaScript / ES6
- TypeScript
- Bootstrap
- SASS
- Git
- React
- Material UI
- MobX
- Redux & Redux toolkit

MODERATE SKILLS

- Node / Express
- MongoDB
- Firebase
- Vue
- REST
- GraphQL
- jQuery

WORK EXPERIENCE

Garment IO
Senior React Developer | *May 2023 – Present*
- Implemented a business intelligence and analytics tool, enabling efficient data analysis, data-driven decision-making, improved collaboration, cost savings, and scalability.
- Conducted comprehensive code reviews to identify and resolve memory leaks and other issues, ensuring superior code quality and preventing potential problems.
- Optimized codebase maintainability and usability by breaking it down into modular components and creating multiple hooks for enhanced reusability and simpler maintenance.
- Improved the application's functionality by adding new features to legacy code and optimizing the class-based component codebase through refactoring, resulting in a more efficient and streamlined application.

AsgaTech
React Developer | *Nov 2022 – May 2023*
- Developed reusable components that significantly reduced development time, resulting in increased efficiency and productivity
- Implemented global state management, localization, and API integration to improve application functionality.
- Implemented performance optimizations to reduce unnecessary component re-renders and improve application speed
- Collaborated with team members through pair programming to improve code quality

Akwad
React Developer | *Oct 2021 – Jul 2022*

RELEVANT PROJECTS

Trackstube (Github - Live)
- Music playing/sharing website, built with React- Apollo Client - GraphQL - Material UI

Cart (Github - Live)
- Front-End e-commerce CRUD application, built with React - Redux Toolkit - Typescript

YelpCamp (Github - Live)
- Full-Stack CRUD application to add and review campgrounds, built with EJS - Node - Express
